

EDUCATION

Northeastern University (NU), Boston, MA

Jan 2017-Present

College of Computer and Information Science, GPA: 3.8/4.0

Expected Graduation: May 2019

*Candidate for a Master of Science in **Data Science***Relevant Courses: Algorithms, Machine Learning, Computer Vision, Large-Scale Parallel Data Processing**Beijing University of Posts and Telecommunications (BUPT)**, Beijing, China

Sept 2012-Jun 2016

Joint Program with Queen Mary University of London (QMUL), GPA: 3.5/4.0

*Bachelor of Science in **Telecommunications Engineering***, with the First Class HonorsRelevant Courses: Data Structures, Intro to Artificial Intelligence, Software Engineering, Calculus, Linear Algebra, Probability Theory and Stochastic Process, Principles of CommunicationsAwards: BUPT Outstanding Final Project (Rank 12/680)

TECHNICAL SKILLS

Languages: Python, Java, SQL, R, Matlab**Machine Learning:** Linear/Logistic Regression, SVM, Tree-based, Neural Networks, Clustering, PCA, etc**Database:** Amazon S3, Oracle Database, Snowflake**Tools:** Tensorflow, Caffe, OpenCV, Amazon ECS, Docker, RStudio, Git, Linux

PROFESSIONAL EXPERIENCE

Data Scientist (Co-op) at Rue La La

Jan 2018-Present

- Worked on feature engineering and training XGBoost model from an iterative perspective to identify suspect resellers from over 2 million buyers, and then put into production tuning the recommendation algorithms.
- Built docker apps for feature extraction, training and inference and deployed on Amazon ECS.

Graduate Teaching Assistant at Northeastern University – CS6140 Machine Learning

Sept 2017-Dec 2017

- Led TA and review sessions, provided timely and appropriate feedback to students' doubts to support their learning.
- Delivered teaching activities including tutorials directed towards building various machine learning models.

Research Assistant at Tsinghua University – Edge Sensing Interaction for Smartwatch

May 2016-July 2016

- Discovered the accelerometer's data collected by tapping the edge of the smartwatch from 4/6/8 directions.
- Collected and preprocessed the accelerometer's data with Python in different scenes of life.
- Classified the tapping motion with logistic regression model and developed the Android Wear demo.

Research Assistant at Chinese Academy of Sciences – Image Retrieval with Deep Learning

Aug 2015-May 2016

- Developed a Three-stage Hybrid Image Retrieval Framework (Classification, Object Detection and Matching) to the task of same-design product image retrieval with convolutional neural networks.
- Experimented on the ALISC 5 million product image dataset with multiple CNN models using Caffe.
- Programmed for the backend of Android demo and achieved real-time same-design product image retrieval.

PROJECT EXPERIENCE

Data Mining on Yelp and Census Data, NU

Sep 2017-Dec 2017

- Extracted neighborhood-level features of business dynamics from Yelp dataset.
- Employed different clustering techniques to investigate the relationship between business dynamics and neighborhood dynamics.

Video Classification on YouTube-8M Dataset, NU

Mar 2017-Apr 2017

- Developed a classifier with TensorFlow that could assign the class label based on given features of the video using a subset of the Google's large-scale YouTube-8M dataset.
- Compared the model and accuracy performance of different machine learning algorithms (LR, SVM, ANN).

Life and Death of Great Open Source Projects, NU

Mar 2017-Apr 2017

- Collected, cleaned and processed repository activity data (issues and commits) from GitHub with R.
- Analyzed activity patterns for projects of different popularity and identified indicators and significant factors that are most directly related to a certain pattern.

Design & Build Winter Hack in London, QMUL

Oct 2015-Feb 2016

- Programmed for the object detection and color recognition algorithm with Python.
- Designed and implemented interactive motions for NAO Robot in Aldebaran.
